AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claim 1 (Currently Amended) A self-inflating article comprising:

- a) an inflatable bladder comprising a substrate comprising a first layer and a second layer which forms a sack;
- a) at least one rupturable reservoir associated with said inflatable bladder;
and
- b) a cleansing composition;[[.]]
wherein said web comprising said first layer and said second layer are low liquid permeable.

Claim 2 - Claim 3 (Canceled).

Claim 4 (Currently Amended) The article of Claim [[3]] 1, wherein said ~~web~~ substrate is selected from the group consisting nonwovens, formed films, films, composite material, laminates, wovens and combinations thereof.

Claim 5 - Claim 7 (Canceled).

Claim 8 (Original) The article of Claim 1, further comprising a gas evolving composition wherein said gas-evolving composition is associated with said inflatable bladder.

Claim 9 (Original) The article of Claim 8, said gas evolving composition further comprises an alkaline and an acidic material.

Application No. 10/644,537

Customer No. 27752

Claim 10 (Original) The article of Claim 9, said alkaline is selected from the group consisting of salts of carbonates and bicarbonates, alkaline peroxides, alkaline azides and mixtures thereof.

Claim 11 (Original) The article of Claim 9, further comprising less than about 75 gsm of said alkaline material.

Claim 12 (Original) The article of Claim 9, said acid material is selected from the group consisting of C₂ to C₂₀ organic mono- and poly-carboxylic acids, C₂ to C₂₀ organophosphorous acids, C₂ to C₂₀ organosulfur, toluene sulfonic acid, peroxides, lactones and mixtures thereof.

Claim 13 (Original) The article of Claim 1, wherein said rupturable reservoir contains a reaction material.

Claim 14 (Previously Presented) The article of Claim 13, said reaction material is selected from the group consisting of water, salts of carbonates and bicarbonates, alkaline peroxides, alkaline azides, C₂ to C₂₀ organic mono- and poly-carboxylic acids, C₂ to C₂₀ organophosphorous acids, C₂ to C₂₀ organosulfur, toluene sulfonic acid, peroxides, lactones and mixtures thereof.

Claim 15 (Original) The article of Claim 14, wherein said reaction material is selected from the group consisting of water, citric acid, sodium bicarbonate and mixtures thereof.

Claim 16 (Previously Presented) The article of Claim 13, wherein said rupturable reservoir delivers said reaction material within said inflatable bladder.

Claim 17 (Currently Amended) The article of Claim 2, said cleansing composition is located on at least one surface of ~~said web of said~~ first layer.

Customer No. 27752

Claim 18 (Original) The article of Claim 1, said cleansing composition is selected from the group consisting of anionic lathering surfactants, nonionic lathering surfactants, amphoteric lathering surfactants, and mixtures thereof.

Claim 19 - Claim 23 (Canceled).

Claim 24 (Original) The article of Claim 1, further comprising a bonding site located at a center location of said article wherein said bonding site is selected from the group consisting of point bonding, bonding lines, bonding areas and combinations thereof.

Claim 25 (Canceled)

Claim 26 (Original) The article of Claim 21, further comprising a cleansing composition wherein said cleansing composition is added at the point of use.

Claim 27 (Canceled)

Claim 28 (Currently Amended) A kit for cleansing the skin and other keratinous surfaces, said kit comprising:

- a) a container having a seal that is removed prior to first use of the article, said container having a cover wherein the cover protects the products not in use; and
- b) a self-inflating personal care article comprising,
 - 1. an inflatable bladder comprising a substrate; comprising a first layer and a second layer which forms a sack;
 - 2. at least one rupturable reservoir associated with said bladder; and
 - 3. a cleansing composition; [[.]]
wherein said substrate comprising said first layer and said second layer are low liquid permeable.
